Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 August 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 4, 2008 has been entered.

Claim Rejections - 35 USC § 112, 1st paragraph

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-14 stand rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

As stated in the previous Office action, the disclosure does not provide sufficient support for the invention as claimed, particularly for the drive structure of the cutting device. For example, the specific structure to simultaneously drive the knives and to provide the knives with different stroke lengths is not sufficiently disclosed and thus it is

not clear as to how such a function is accomplished. Further, the figures, particularly Figure 5, do not clearly illustrate the structure to perform the claimed functions. As a further example, the specific structure of the drive components including the rotor means, the coupling means and the rotating drive means are not sufficiently disclosed, and thus it is not clear as to how they interact with one another as well as how they act together to drive the knives.

Claims Not Rejected Over Prior Art

4. Claims 1-14 are considered to read over the prior art of record because the prior art or record does not teach or suggest the combination of features as claimed. However, these claims **cannot** be considered to be "allowable" at this time due to the rejection(s) under 35 U.S.C. 112, 1st paragraph set forth in this Office action. Therefore, upon the claims being rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action, further consideration of these claims with respect to the prior art will be necessary.

Response to Arguments

5. Applicant's arguments filed June 4, 2008 have been fully considered but they are not persuasive.

In the fourth paragraph on page 5 of the subject response, applicant argues that the disclosure is sufficient since the specification is written to the level of one having ordinary skill in the art. However, it is respectfully submitted that the deficiencies in the

disclosure are directed to the meat of the invention, and the Examiner's position is that the disclosure does not sufficiently disclose the specifics of the invention and how the invention is made.

In the paragraph bridging pages 5-6 of the subject response, the Examiner respectfully maintains that the disclosure does not sufficiently disclose the invention. Applicant points to Figures 4 and 5 and the gear mechanisms 14 and 15, and then explains the details of the gear mechanisms. However, it is not obvious from the drawings as to what components are shown, and the specific details of the gear mechanisms are not provided in the original disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark F. Dexter whose telephone number is (571)272-4505. The examiner can normally be reached on Mondays, Tuesdays, Thursdays and Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer D. Ashley can be reached on (571)272-4502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
